

Polites TNT

Non-woven geotextile (such as **Polites TNT**) for reinforcing liquid waterproofing. High-tenacity, needle-punched and thermo-calendared fabric, free from resins and adhesives (80 g/m²). UV-resistant, improves the tensile strength and puncture resistance of liquid waterproofing systems. It is highly stable, non-toxic and can be used in combination with many products. Minimum required characteristics: Broadband tensile strength 4.00 kN/m; Static puncture resistance 750 N; Dynamic puncture resistance 43.00 mm; Normal-to-plane permeability 0.090 m/s.
