

## *Decork Mediterraneo*

Coloured finishing coating (such as **Decork Mediterraneo**), based on cork with a grain size of 0 - 300 µm and clay, water-based resins and high-tech waxes, designed to increase the mechanical properties and water repellency of the product. Characterized by high thermo-insulating, water-repellent and breathable properties, the product is ecological and designed to be used for the coloured finishing of old and new facades, thermal plasters (such as *Diathonite Evolution* or *Diathonite Thermactive.037*), coating systems and pitched roofs. It can be used both indoors and outdoors, for wall and floor decoration. It prevents the absorption of meteoric water by the masonry and prolongs the life of the plaster. The product can be applied by trowel, brush, roller and plastering machine, depending on the type of finish desired. Minimum required characteristics: Elasticity 195%; Crack Bridging Ability 1.5 mm; Thermal conductivity ( $\lambda$ ) 0.057 W/mK; Water vapour permeability  $\mu=7$ .
